EDUCATION

University of Guelph

Bachelor of Engineering, Computer Engineering Co-op

September 2025 – April 2030 (Expected)

Guelph, Ontario

TECHNICAL SKILLS

Languages & Developer Tools: Python, HTML, CSS, JavaScript, Java, C/C++, Git, GitHub

Frameworks & Libraries: React, Bootstrap, Node.js, Next.js, Tailwind CSS, NumPy, React Spring

Software/Hardware & Design: Office 365, Adobe Creative Cloud, AutoCAD, Soldering, Linux

Soft Skills: Leadership, Project Coordination, Communication, Teamwork, Multitasking, Problem Solving, Arabic

WORK EXPERIENCE

Digital Fixers

Guelph, Ontario

Start-up Founder

January 2025 – September 2025

- Drove a 90% increase in business visibility and customer acquisition by architecting and deploying custom web solutions and digital marketing integrations using HTML/CSS.
- Resolved complex board-level issues by engineering a hardware/software diagnostic workflow, utilizing multimeters and debugging tools to troubleshoot system failures.
- Ensured 100% reliable part availability for repairs by optimizing supply chain logistics and developing complex Excel models to track expenses and manage global orders.

Pearl Travel

Alexandria, Egypt (remote)

Software Engineering Intern

June 2025 – August 2025

- Captured new online market share and increased user interaction by 70% by designing a responsive web platform using HTML, CSS, and JavaScript.
- Aligned technical development with business objectives by consistently communicating with management regarding web design, marketing strategies, and platform updates.
- Generated \$20,000 in additional revenue by implementing targeted UI/UX optimizations that significantly improved the customer purchasing journey.
- Maintained cross-functional data consistency by collaborating via Agile methodologies, utilizing Salesforce and Adobe tools to integrate design and marketing requirements.

Loblaws Group

Oakville, Ontario

Asset Protection Agent

January 2025 – September 2025

- Achieved an asset protection success rate of over 95% by coordinating closely with management to enforce comprehensive security protocols.
- Prevented theft incidents and resolved critical situations effectively by applying psychological de-escalation techniques during high-stress encounters.

PROJECTS

Engineering & Design I

Guelph, Ontario

Circuit/Code Designer

September 2025 – December 2025

- Ensured optimal output under varying loads by designing and fabricating an embedded electromechanical system with Arduino Uno and C++ to control DC motors.
- Ensured effective development within project constraints by conducting rigorous analysis of sustainability, cost, and ethics, modeling physical parameters using AutoCAD and Excel.
- Navigated complex project requirements by actively applying real-world engineering criteria focused on sustainability, cost-effectiveness, and ethical compliance.
- Delivered comprehensive technical documentation to clients by drafting full contracts and reports detailing cost, weight, emissions, and circuit diagrams using Word, Excel, and AutoCAD.

Embedded Systems Design

Milton, Ontario

Key Safe Locker

April 2025 – May 2025

- Optimized the spatial layout for internal circuitry and power management by utilizing AutoCAD to design a custom enclosure for a functional electromechanical key-safe locker.
- Delivered a secure access system and comprehensive technical report by programming a user interface with an OLED display and matrix keypad, documenting all iterative changes in a detailed log.
